Imagine you are a veterinary doctor who can understand the language of the animals. One day you met a dog who had encountered an accident and severely injured its legs. You happened to bring him to your house and take care of him. On that same night a theft took place in your neighbour's house.

Referring to the above situation--

- 1) How did this dog help you and your neighbour catch the thief and solve this case?**
- 2) How was the dog awarded in the end?**
